Dear Reader,

With the 2010-2011 year coming to an end it is not a bad habit to rethink your performance as an individual and as a company. I am sure many of you do the same.

In doing so it is always a pleasure to get feed back from your clients about your services. And what a better way to experience that feed-back than by realizing how the demand for the Blygold anti-corrosion treatment continues to increase nationwide.

All the Blygold locations are now in full operation and we see a continued interest in activities and application of our protective coatings.

Congratulations to Blygold WA manager Derrick Nichols who has recently secured a fantastic location in unit 4, 6 Gibberd Road, Balcatta WA.

We will continue to inform you about new developments and where we have been able to service you better. Thank you for your continued support and we look forward to working even better with you in the coming year.

Best regards,

Ray Van Haven
 General Manager

FLEMINGTON RACECOURSE CHILLER TREATED BY BLYGOLD VICTORIA IN MELBOURNE.

ASK US:

What is the difference between pre-coat (epoxy, vinyl) and Blygold anti corrosion coating?

Blygold's coating is an aluminum-impregnated polyurethane, which is applied after the heat exchanger is assembled to allow for total coverage and complete penetration.

Epoxy / vinyl coatings are inferior to polyurethane by their composition and the pre-coat process does not permit total coverage due to the cut edges being exposed after fabrication and the holes being punched for the tubes.

Not only will pre-coat systems have a very temporary effect against corrosion, they will also reduce the initial capacity with up to 15%.

UV resistance is also quite often an ongoing problem with the Epoxy coatings.

ABOVE: FLEMINGTON RACE COURSE CHILLER NEEDED ANTI-CORROSION PROTECTION BY BLYGOLD VICTORIA. THE CHILLER COILS WILL NOW LAST A LOT LONGER THAN OTHERWISE WOULD HAVE BEEN THE CASE.

ABOVE: BLYGOLD NSW TREATING COILS IN THEIR WORKSHOP IN THORNLEIGH. THESE COILS WERE 8 ROWS DEEP AND SUCCESSFULLY TREATED.

RIGHT: DERRICK NICHOLS, MANAGER BLYGOLD WA AND HIS TRAILER SPECIALLY EQUIPPED FOR WORK ON MINING SITES.

Above: Photos from the Zenith Centre at Chatswood.. These were two massive Air Handling Units (Tower A and Tower B). There were approximately 70 coils inc heating coils!!! The Property management were Dexu Group, the Consultants were NDY, the Services company was Haden.

The clients wanted extended life from their coils to save on huge capital costs and also wanted to maintain their energy bill over next 5-10 years. Blygold NSW was able to do this !

An investment in knowledge always pays the best interest. - Benjamin Franklin

Left: Two new shiny freshly protected Trane units are on their way to Broome Airport after Blygold WA joined forces with Blygold SA NT.

Dalkia in Perth were after a quick turnaround period for the units to be freighted up to Broome and Blygold delivered on time!

SA-NT Director Darryl Rundle said "the job went off without a problem and it was a pleasure to coat these units and work together with my Blygold colleague, Director Derrick Nichols, to service an important client for us both"

Blygold Australia

Your partner in corrosion prevention.
